

Geometry Think Book

Table of Contents

Date	Lesson	Title	
		Table of Contents.....	i
		The Eight Mathematical Practices	1
		Depth of Knowledge (DOK) Levels.....	2
		General Team Roles.....	3
		Syllabus	4
		Graphing Calculator	5
8/18	1.1.1	Creating a Quilt class notes	7
		Math Notes: Lines of Symmetry (text p. 6).....	8
8/22	1.1.2	Mobius strip: Complete Learning Reflection (see text p. 10).....	9
		Math Notes: The Investigative Process (text p. 11).....	10
8/23–24	1.1.3	11
		Math Notes: The Perimeter and Area of a Figure (text p. 16).....	12
8/29	1.1.5	Building a Kaleidoscope class notes.....	13
		Math Notes: Types of Angles (text p. 26)	14
		15
		16
8/30–31	1.2.1	Spatial Visualization and Reflections (follow instruction on text p. 30).....	17
		Math Notes: Probability Vocabulary and Definitions (text p. 31)	18
9/1	1.2.2	Rigid Transformations: Rotations and Translations class notes	19
		Math Notes: Rigid Transformations (text p. 37).....	20
		21
		Construction Manual (stored in pocket of Think Book)	22
9/8	1.2.3	Slopes of Parallel and Perpendicular Lines class notes	23
		24
9/9	1,2,4	Defining Transformation class notes	25
		Math Notes: Formal Definitions of Rigid Transformations (text p. 47).....	26
9/12	1.2.6	Symmetry class notes (included Learning Log questions, text p. 58).....	27
		Math Notes: Parallel and Perpendicular Slopes (text p. 59).....	28
9/13–14	1.3.1–	Characteristics of Shapes class notes	29
	1.3.2	Math Notes: Venn Diagrams (text p. 64).....	30
		31
		32
		33
		Shapes Toolkit.....	34
		

Geometry Think Book
Table of Contents

Date	Lesson	Title	
9/26	2.1.1	Angle Relationships notes. Include Vertex; Complementary, Supplementary, and Vertical Angles. (see Learning Log, text p. 82).....	37
		Math Notes: Angle Relationships (text p. 83).....	38
9/27-28	2.1.2–	Angles formed by Transversals notes. Include definitions of Transversal;	
	2.1.3	Alternate Interior angles (AIA) and Same-Side Interior angles (SIA)	39
		Math Notes: Naming Parts of Shapes (text p. 88)	40
		Angle Relationship Toolkit (glued on page).....	41
		Math Notes: Systems of Linear Equations (text p. 95)	42
		43
		44
9/29	2.1.4	Angles in a Triangle notes. Include Triangle Sum Theorem.....	45
		Math Notes: More Angle Pair Relationships (text p. 100).....	46
10/4	2.2.2–	Areas of Triangles and Composite Shapes notes. Include $A = \frac{1}{2}bh$ for	
	2.2.3	triangles; for obtuse triangle height is outside the triangle	47
		Math Notes: Multiplying Binomials (text p. 114) and	
		Conditional Statements (text p. 119).....	48
		
10/7	2.3.1	Area Toolkit (glued on page)	55
		Graph paper for problem 2-99	56
		Triangle Inequality notes. Include for $\triangle ABC$, $b - c < a < b + c$	57
		Math Notes: Right Triangle Vocabulary (legs, hypotenuse)	58
10/10	2.3.2	Pythagorean Theorem notes (see Learning Log, text p. 132).....	59
		Math Notes: The Pythagorean Theorem (text p. 133)	60
10/17	3.1.1	Dilations notes	63
		Math Notes: Dilations (text p. 148)	64
10/18–19	3.1.2–	Similarity notes. Include definition of zoom factor, congruent.....	65
	3.1.3	Math Notes: Ratio of Similarity and Zoom Factor (text p. 154)	66
		
		Math Notes: Proportional Equations (text p. 158)	68
10/20	3.1.4–	Conditions for Triangle Similarity notes. Include defn's of AA, SAS, SSS.....	69
	3.2.1	Math Notes: Conditions for Triangle Similarity (text p. 170)	70
10/25–26	3.2.2–	Creating a Flowchart and Triangle Similarity and Congruence notes.....	73
	3.2.3	Math Notes: Congruent Shapes (text p. 175).....	74
10/27	3.2.4	More Conditions for Triangle Similarity notes.....	75
		Math Notes: Writing a Flowchart	76
10/31	3.2.5	Triangle Similarity notes	77
		Math Notes: Complete Conditions for Triangle Similarity (text p. 192).....	78
